Strategic report

The Directors present their Strategic report for Glencore Finance (Europe) Limited (the "Company") for the year ended 31 December 2025 to provide a review of the Company's business, principal risks and uncertainties, performance, and position. The Company is a wholly owned subsidiary of Glencore Group Corporation and is ultimately wholly owned by Glencore plc ("Glencore" or "the Group").

Organisation

The Company's primary objective is to hold investments in some of the Group's largest mining and industrial assets and to raise funding in capital markets whose proceeds are lent to or invested in other Group entities. Glencore plc together with other Group entities has unconditionally and irrevocably guaranteed the Company's liabilities to external bond holders. All the outstanding external bond liabilities are due for repayment within one year (note 16).

No other changes in the above business model are anticipated in the coming year.

Business review

As shown in the Statement of Income on page 15, the loss for the year after taxation was USD 60 million (2024: profit of USD 3,757 million). The Statement of Financial Position on page 16 shows that the Company's net assets have marginally decreased compared with the prior year from USD 5,947 million to USD 5,884 million. No dividend was approved by the Directors during the year (2024: nil).

Principal risks and risk governance

The Board of Directors are responsible for approving risk management principles and policies and ensuring that the Company's management maintains an effective system of internal controls. They are responsible for the management of risk within the framework of risk management principles and policies approved by the Board.

The Company's principal risks are the supply, demand and prices of commodities which have a significant impact on the valuation of the Company's investment in Glencore International Investments Ltd ("GILL") and the Company's ability to generate dividend income to service its debt obligations. Other principal risks include foreign exchange and interest rate risks resulting from capital market debt issuances.

The Company relies on the Group's risk management activities in mitigating against possible negative impacts of supply and demand fundamentals on commodity prices which focuses on cost discipline, operational efficiency and tracking the shifts in demand to maximise capital allocation. The Company manages its foreign exchange and interest rate risks by hedging predominantly with another Group entity as well as third parties and by matching assets and liabilities.

The Company is evaluating the control weaknesses noted by our auditor on page 11 and is taking appropriate remediation actions.

Approved by the Directors and signed on behalf of the Board of Directors.

Timothy Scott
Director

Warren Brouil
Director

02 April 2026

Directors' report

The Strategic report on page 4 contains details of the principal activities of the Company and provides information on the Company's business during the year.

Directors

The Directors who held office during the year are shown on page 3

Going concern

The Company is expected to continue its activities as an investment company that also supports the Group's financing activities. The Company expects to be able to generate sufficient dividend income from its investments to meet its liabilities as they fall due.

As noted in the Strategic report, Glencore plc, together with other Group entities, has unconditionally and irrevocably guaranteed the Company's external bond liabilities. The Group has updated its going concern assessment at 31 December 2025 considering the Group's budgeted cash flows and related assumptions including appropriate stress testing of identified uncertainties (being primarily commodity prices and foreign currency exchange rates) as well as access to undrawn credit facilities and monitoring of debt maturities. Based on the Group's updated liquidity forecasts and projections, the Directors believe they have a reasonable basis to conclude that the Group and the Company will be able to meet their liabilities as they fall due for at least the next 12 months from when the financial statements are authorised for issue. Accordingly, it is appropriate for the Company to adopt the going concern basis in preparing these financial statements.

Subsequent events

The Company made a repayment of the GBP 500 million 3.125% coupon bonds in March 2026.

Auditor

Each of the persons who is a Director at the date of approval of these financial statements confirms that:

- a) so far as the Director is aware, there is no relevant audit information of which the Company's auditor is unaware; and
- b) the Director has taken all the steps that he or she ought to have taken as a director in order to make himself or herself aware of any relevant audit information and to establish that the Company's auditor is aware of that information.

Pursuant to Article 113 of the Companies (Jersey) Law 1991, Deloitte LLP were re-appointed during the year and will therefore continue in office.

Approved by the Directors and signed on behalf of the Board of Directors

Timothy Scott
Director

Warren Blount
Director

02 April 2026

Directors' responsibilities statement

The Directors are responsible for keeping adequate accounting records that are sufficient to show and explain the Company's transactions and disclose with reasonable accuracy at any time the financial position of the Company and enable them to ensure that its financial statements comply with the Companies (Jersey) Law 1991. They are also responsible for safeguarding the assets of the Company and hence for taking reasonable steps for the prevention and detection of fraud and other irregularities.

Applicable Company law requires the Directors to prepare financial statements for each financial year and accordingly the Directors have elected to prepare the financial statements in accordance with United Kingdom Generally Accepted Accounting Practice, including Financial Reporting Standard 101 *Reduced Disclosure Framework*.

By making this election, the Directors are required to:

- select suitable accounting policies and then apply them consistently;
- make judgements and accounting estimates that are reasonable and prudent;
- state whether United Kingdom Generally Accepted Accounting Practice, including Financial Reporting Standard 101 *Reduced Disclosure Framework* has been followed, subject to any material departures disclosed and explained in the financial statements; and
- prepare the financial statements on the going concern basis unless it is inappropriate to presume that the Company will continue in business.

Under Company law, the Directors must not approve the financial statements unless they are satisfied that they give a true and fair view of the state of affairs of the Company and of the profit or loss of the Company for that period.

Independent auditor's report
to the members of Glencore Finance (Europe) Ltd
Report on the audit of the financial statements

1. Opinion

In our opinion the financial statements of Glencore Finance (Europe) Limited (the 'Company'):

- give a true and fair view of the state of the Company's affairs as at 31 December 2025 and of its loss for the year then ended;
- have been properly prepared in accordance with United Kingdom Generally Accepted Accounting Practice, including Financial Reporting Standard 101 "Reduced Disclosure Framework"; and
- have been prepared in accordance with Companies (Jersey) Law 1991.

We have audited the financial statements which comprise:

- the statement of income;
- the statement of other comprehensive income;
- the statement of financial position;
- the statement of changes in equity; and
- the related notes 1 to 19.

The financial reporting framework that has been applied in their preparation is applicable law and United Kingdom Accounting Standards, including Financial Reporting Standard 101 "Reduced Disclosure Framework" (United Kingdom Generally Accepted Accounting Practice).

2. Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (UK) (ISAs (UK)) and applicable law. Our responsibilities under those standards are further described in the auditor's responsibilities for the audit of the financial statements section of our report.

We are independent of the Company in accordance with the ethical requirements that are relevant to our audit of the financial statements in the UK, including the Financial Reporting Council's (the 'FRC's') Ethical Standard as applied to listed entities, and we have fulfilled our other ethical responsibilities in accordance with these requirements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

3. Summary of our audit approach

Key audit matters	The key audit matter that we identified in the current year was: <ul style="list-style-type: none">• Valuation of investment in Glencore International Investments Ltd.
Materiality	The materiality that we used in the current year was \$189 million (2024:\$191 million) which was determined on the basis of 1.5% of total assets.
Scoping	Audit work to respond to the risks of material misstatement was performed directly by the audit engagement team.

Significant changes in our approach

There were no changes in our audit approach compared to the prior year.

4. Conclusions relating to going concern

In auditing the financial statements, we have concluded that the Directors' use of the going concern basis of accounting in the preparation of the financial statements is appropriate.

Our evaluation of the Directors' assessment of the Company's ability to continue to adopt the going concern basis of accounting has focused on Glencore Finance (Europe) Limited's ('GFE's') ability to repay liabilities as they fall due for the going concern assessment period and the Glencore plc Group's (the "Group's") ability to settle the Company's liabilities as they fall due, as the ultimate guarantor of the Company's external bondholders.

As part of this assessment:

- We considered the effect of key risks on the Group's business model as part of our risk assessment and analysed how these risks might affect the Group's liquidity position, including access to capital, and thus its ability to continue to operate as a going concern. The risk we considered to have the greatest impact is the supply, demand and prices of commodities over the forecast period.
- We assessed the basis for the assumptions used in the forecast information including operational profitability, the Group's debt repayment obligations and capital expenditure requirements as well as undrawn facilities.
- We assessed the downside stress scenarios applied by the Directors in their analysis, in particular whether the downside scenarios represented an appropriately robust sensitivity. We evaluated the effect of these scenarios on key metrics such as liquidity headroom, net debt and net debt to Adjusted EBITDA over the going concern period and performed additional sensitivities to further challenge the Group's forecast position.
- We assessed the Directors' reverse stress scenario and the Directors' conclusion that such a scenario is remote.

Based on the work we have performed, we have not identified any material uncertainties relating to events or conditions that, individually or collectively, may cast significant doubt on the Company's ability to continue as a going concern for a period of at least twelve months from when the financial statements are authorised for issue.

Our responsibilities and the responsibilities of the Directors with respect to going concern are described in the relevant sections of this report.

5. Key audit matters

Key audit matters are those matters that, in our professional judgement, were of most significance in our audit of the financial statements of the current period and include the most significant assessed risks of material misstatement (whether or not due to fraud) that we identified. These matters included those which had the greatest effect on: the overall audit strategy; the allocation of resources in the audit; and directing the efforts of the engagement team.

These matters were addressed in the context of our audit of the financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

5.1. Valuation of investment in Glencore International Investments Ltd.

Key audit matter description	<p>The Company holds a 100% investment in Glencore International Investments Ltd. (“GILL”) carried at a net book value of \$9,626 million as disclosed in note 11 at 31 December 2025 (2024: \$9,626 million). GILL holds various indirect investments in some of the Group’s largest operating industrial assets with the largest being the Australian thermal coal assets and Canadian hard coking coal assets. The recoverability of the investment in GILL is supported by the aggregated net recoverable values of the underlying industrial assets. As a result of the level of estimation in determining the recoverable value of GILL, we identified the valuation of the investment as a key audit matter.</p> <p>Group management completes an impairment indicators assessment on all of the significant industrial assets in the Group as part of the annual budgeting process.</p> <p>To assess the possible impact of climate change on the Company’s coal assets, the Group has developed a number of downside sensitivities based on various scenarios published by the International Energy Agency (“IEA”), including a net zero emissions by 2050 scenario (“NZE”). Management prepared a schedule comparing the amount of the investment value in GILL against the aggregated net recoverable values of GILL’s underlying investments and concluded that significant headroom existed, and consequently no impairment indicator was identified on the Company’s investment in GILL.</p> <p>Management concluded that the GILL investment is not sensitive to reasonably possible changes in the next financial year that could have a material impact on its value.</p> <p>The accounting policy applied by management is disclosed in note 2 under Investment in subsidiary companies.</p>
-------------------------------------	--

How the scope of our audit responded to the key audit matter	<ul style="list-style-type: none"> • We obtained an understanding of the methodology applied by management in developing its impairment assessments at the underlying operational level and how value from those operations affects the Company’s investment valuation. • We considered management’s assessment of impairment indicators in GILL and performed an independent assessment of impairment indicators. • We evaluated management’s assessment of impairment risk and their assessment of the indicators of impairment and challenged the significant assumptions used and the data sources on which these assumptions were based. • We obtained a schedule from management listing each of the investments in operating assets ultimately owned by GILL, and the recoverable amounts of those investments. We reconciled the recoverable values in the schedule to appropriate accounting records and underlying valuation models. • We evaluated the impact of climate-related risks relating particularly to the Company’s investment in thermal coal assets by comparing management’s impact assessment with reputable public industry projections of demand into the future, such as the International Energy Agency’s (the “IEA”), including a net zero emissions by 2050 scenario (“NZE”) and using management’s impairment models to perform sensitivities on long-term price assumptions based on external broker consensus price projections and IEA projections. • To evaluate the Company’s impairment indicators assessment, we have recalculated the estimated recoverable amounts of GILL’s indirectly held industrial assets, less the value of other net liabilities of the GILL subgroup.
---	--

Key observations	Based on the work performed we concluded that the valuation of investment in GILL is appropriate
-------------------------	--

6. Our application of materiality

6.1. Materiality

We define materiality as the magnitude of misstatement in the financial statements that makes it probable that the economic decisions of a reasonably knowledgeable person would be changed or influenced. We use materiality both in planning the scope of our audit work and in evaluating the results of our work.

Based on our professional judgement, we determined materiality for the financial statements as a whole as follows:

Materiality	\$189 million (2024: \$191 million)
Basis for determining materiality	1.5% of total assets (2024: 1.5% of total assets)
Rationale for the benchmark applied	Materiality was based on total assets as one of the Company's primary functions is that of an investment holding Company. Cash flows from the underlying investments and loans are applied to settling the Company's liabilities as they fall due. We consider total assets to therefore be of primary importance to both the Company's sole shareholder and the external bond holders.

6.2. Performance materiality

We set performance materiality at a level lower than materiality to reduce the probability that, in aggregate, uncorrected and undetected misstatements exceed the materiality for the financial statements as a whole. Performance materiality was set at 70% of materiality for the 2025 audit (2024: 70%). In determining performance materiality, we considered a number of factors, including: our understanding of the control environment; our understanding of the business; and the low number of uncorrected misstatements identified in the prior periods.

6.3. Error reporting threshold

We agreed with the Directors that we would report all audit differences in excess of \$9.4 million (2024: \$9.5 million) to the Directors, as well as differences below that threshold that, in our view, warranted reporting on qualitative grounds. We also report to the Directors on disclosure matters that we identified when assessing the overall presentation of the financial statements.

7. An overview of the scope of our audit

7.1. Scoping

Our audit was scoped by obtaining an understanding of the Company and its environment, including internal control, and assessing the risks of material misstatement. Audit work to respond to the risks of material misstatement was performed directly by the audit engagement team.

7.2. Our consideration of the control environment

The Company relies on the effectiveness of a number of IT systems and applications to ensure that financial transactions are recorded completely and accurately. The main financial accounting and treasury systems were identified as key IT systems relevant to our audit. We tested General IT Controls (“GITCs”) as part of our audit.

The IT systems which are managed from the centralised IT function in Switzerland were evaluated by IT specialists who were part of the Group audit team. Our testing identified control deficiencies in access management and change management.

Management is evaluating the internal control deficiencies. Please refer to Strategic Report Section on page 4 of the Annual Report.

8. Other information

The other information comprises the information included in the annual report other than the financial statements and our auditor’s report thereon. The Directors are responsible for the other information contained within the annual report.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

Our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the course of the audit, or otherwise appears to be materially misstated.

If we identify such material inconsistencies or apparent material misstatements, we are required to determine whether this gives rise to a material misstatement in the financial statements themselves. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact.

We have nothing to report in this regard.

9. Responsibilities of Directors

As explained more fully in the Directors’ responsibilities statement, the Directors are responsible for the preparation of the financial statements and for being satisfied that they give a true and fair view, and for such internal control as the Directors determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the Directors are responsible for assessing the Company’s ability to continue as a going concern, disclosing as applicable, matters related to going concern and using the going concern basis of accounting unless the Directors either intend to liquidate the Company or to cease operations, or have no realistic alternative but to do so.

10. Auditor's responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs (UK) will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

A further description of our responsibilities for the audit of the financial statements is located on the FRC's website at: www.frc.org.uk/auditorsresponsibilities. This description forms part of our auditor's report.

11. Extent to which the audit was considered capable of detecting irregularities, including fraud

Irregularities, including fraud, are instances of non-compliance with laws and regulations. We design procedures in line with our responsibilities, outlined above, to detect material misstatements in respect of irregularities, including fraud. The extent to which our procedures are capable of detecting irregularities, including fraud is detailed below.

11.1. Identifying and assessing potential risks related to irregularities

In identifying and assessing risks of material misstatement in respect of irregularities, including fraud and non-compliance with laws and regulations, we considered the following:

- the nature of the industry and sector, control environment and business performance including the design of the company's remuneration policies, key drivers for directors' remuneration, bonus levels and performance targets;
- the Company's own assessment of the risks that irregularities may occur either as a result of fraud or error;
- the results of our enquiries of management and the Directors about their own identification and assessment of the risks of irregularities, including those specific to the Company's sector;
- any matters we identified having obtained and reviewed the Group's documentation of its policies and procedures relating to:
 - identifying, evaluating and complying with laws and regulations and whether they were aware of any instances of non-compliance;
 - detecting and responding to the risks of fraud and whether management have knowledge of any actual, suspected or alleged fraud; and
 - the internal controls established to mitigate risks of fraud or non-compliance with laws and regulations;
- the matters discussed among the audit engagement team and relevant internal specialists, including tax, valuations, IT and forensic specialists regarding how and where fraud might occur in the financial statements and any potential indicators of fraud.

As a result of these procedures, we considered the opportunities and incentives that may exist within the organisation for fraud.

In common with all audits under ISAs (UK), we are also required to perform specific procedures to respond to the risk of management override.

We also obtained an understanding of the legal and regulatory frameworks that the Company operates in, focusing on provisions of those laws and regulations that had a direct effect on the determination of material amounts and disclosures in the financial statements. The key laws and regulations we considered in this context included Companies (Jersey) Law 1991 and relevant tax laws.

In addition, we considered provisions of other laws and regulations that do not have a direct effect on the financial statements but compliance with which may be fundamental to the Company's ability to operate or to avoid a material penalty. These included the US Foreign Corrupt Practices Act, the US Anti-Money Laundering regulations, the UK Bribery Act 2010 and the Group's operating licences and environmental regulations in the jurisdictions in which it operates.

11.2. Audit response to risks identified

As a result of performing the above, we did not identify any key audit matters related to the potential risk of fraud or non-compliance with laws and regulations.

In addition to the above, our procedures to respond to risks identified included the following:

- reviewing the financial statement disclosures and testing to supporting documentation to assess compliance with provisions of relevant laws and regulations described as having a direct effect on the financial statements;
- enquiring of management and the General Counsel concerning actual and potential litigation and claims;
- performing analytical procedures to identify any unusual or unexpected relationships that may indicate risks of material misstatement due to fraud;
- reading minutes of meetings of those charged with governance, reviewing internal audit reports and reviewing correspondence with relevant regulatory and taxation authorities, where applicable;
- obtaining an understanding of the Group's compliance policies, procedures and controls, including the procedures to mitigate the risk of and response to allegations of fraud, bribery and corruption;
- in addressing the risk of fraud through management override of controls, testing the appropriateness of journal entries and other adjustments; assessing whether the judgements made in making accounting estimates are indicative of a potential bias; and evaluating the business rationale of any significant transactions that are unusual or outside the normal course of business.

We also communicated relevant identified laws and regulations and potential fraud risks to all engagement team members including internal specialists, and remained alert to any indications of fraud or non-compliance with laws and regulations throughout the audit.

Report on other legal and regulatory requirements

12. Matters on which we are required to report by exception

12.1. Adequacy of explanations received and accounting records

Under the Companies (Jersey) Law, 1991 we are required to report to you if, in our opinion:

- we have not received all the information and explanations we require for our audit; or
- proper accounting records have not been kept, or proper returns adequate for our audit have not been received from branches not visited by us; or
- the financial statements are not in agreement with the accounting records and returns.

We have nothing to report in respect of these matters.

13. Use of our report

This report is made solely to the Company's members, as a body, in accordance with Article 113A of the Companies (Jersey) Law 1991. Our audit work has been undertaken so that we might state to the Company's members those matters we are required to state to them in an auditor's report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the Company and the Company's members as a body, for our audit work, for this report, or for the opinions we have formed.

A handwritten signature in blue ink, appearing to read 'W. Brooks', is positioned above the printed name.

Notes to the financial statements

1. GENERAL INFORMATION

Glencore Finance (Europe) Limited is a public limited Company registered in Jersey with registered number 124626 and registered office at 26 New Street, St Helier, Jersey, JE2 3RA. The Company is tax resident in the United Kingdom.

The Company is a wholly owned subsidiary of Glencore Group Corporation and is ultimately wholly owned by Glencore plc.

The Company's functional currency is the US Dollar (USD) as this is assessed to be the principal currency of the economic environment in which it operates.

The Group accounts of Glencore plc are available to the public and can be obtained as set out in note 19, as is the registered office address of the parent company preparing consolidated accounts.

2. ACCOUNTING POLICIES

Basis of accounting

The Company meets the definition of a qualifying entity under FRS 100 'Application of Financial Reporting Requirements' issued by the FRC. Accordingly, these financial statements were prepared in accordance with Financial Reporting Standard 101 'Reduced Disclosure Framework' as issued by the Financial Reporting Council.

In accordance with FRS 101 the Company has:

- provided comparative information;
- applied the same accounting policies throughout all periods presented;
- retrospectively applied FRS 101 as required; and
- applied certain optional exemptions and mandatory exceptions as applicable for FRS 101.

Exemptions

As permitted by FRS 101, the Company has taken advantage of the disclosure exemptions available under that standard in relation to financial instruments, fair values, capital management, presentation of a cash flow statement, standards not yet effective, related party transactions and disclosures on Pillar Two reporting. Where relevant, equivalent disclosures have been given in the Group accounts of Glencore plc.

These financial statements are separate financial statements. The Company is exempt from the preparation and delivery of consolidated financial statements, because the Company is included in the Group accounts of Glencore plc. The Group accounts of Glencore plc are available to the public and can be obtained as set out in note 19.

These financial statements have been prepared under the historical cost convention, except for the revaluation of certain financial instruments that are measured at fair value at the end of each reporting period, as explained in the accounting policies below. Historical cost is generally based on the fair value of the consideration given in exchange for the goods and services.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date, regardless of whether that price is directly observable or estimated using another valuation technique. In estimating the fair value of an asset or a liability, the Company takes into account the characteristics of the asset or liability if market participants would take those characteristics into account when pricing the asset or liability at the measurement date. Fair value for measurement purposes in these financial statements is determined on such a basis.

In addition, for financial reporting purposes, fair value measurements are categorised into Level 1, 2 or 3 based on the degree to which the inputs to the fair value measurements are observable and the significance of the inputs to the fair value measurement in its entirety, which are described as follows:

- Level 1 inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities that the entity can access at the measurement date;
- Level 2 inputs are inputs, other than quoted prices included within Level 1, that are observable for the asset or liability, either directly or indirectly; and
- Level 3 inputs are unobservable inputs for the asset or liability.

2. ACCOUNTING POLICIES (CONTINUED)

The Company has adopted the following principal accounting policies:

Adoption of new and revised standards

Amendments to IAS 1 Presentation of Financial Statements - Classification of Liabilities as Current or Non-current

Lack of Foreign Currency Exchangeability (Amendments to IAS 21) – effective for year ends beginning on or after 1 January 2025

The amendments require entities to apply a consistent approach when assessing whether a currency is exchangeable into another and, when it is not, to determine the appropriate exchange rate and provide the related disclosures. These amendments did not have a material impact on the Company.

Going concern

Despite the net current liability position, the Company is expected to continue its activities as an investment Company that also supports the Group's financing activities. The Company expects to be able to generate sufficient dividend income from its investments to meet its liabilities as they fall due.

Notwithstanding the above, Glencore plc together with other Group entities has unconditionally and irrevocably guaranteed the Company's external bond liabilities. The Group has updated its going concern assessment for the year ended 31 December 2025 considering the Group's budgeted cash flows and related assumptions including appropriate stress testing of identified uncertainties (being primarily commodity prices and foreign currency exchange rates) as well as access to undrawn credit facilities and monitoring of debt maturities. Based on the Group's updated liquidity forecasts and projections, the Directors believe they have a reasonable basis to conclude that the Group and Company will be able to meet their liabilities as they fall due for at least the next 12 months from when the financial statements are authorised for issue. Accordingly, it is appropriate for the Company to adopt the going concern basis in preparing these financial statements.

Revenue recognition

Financial income

Interest income is recognised when the right to receive payment has been established, it is probable that the economic benefits will flow to the Company and the amount of income can be measured reliably. Interest income is accrued on a time basis, by reference to the principal outstanding and at the effective interest rate applicable.

Dividend income is recognised when the right to receive the payment has been established, it is probable that the economic benefits will flow to the Company and the amount of income can be measured reliably.

Foreign currency transactions

Transactions in foreign currencies are converted into the functional currency using the exchange rate prevailing at the transaction date. Monetary assets and liabilities outstanding at year end are converted at year end closing rates. The resulting exchange differences are recorded in the Statement of Income. Currency and interest rate risks are suitably hedged both with another Group entity and external counterparties. Non-monetary assets and liabilities are converted at the historical foreign exchange rate at the time of the transaction.

Cash and cash equivalents

Cash and cash equivalents comprise cash held at bank, cash in hand and short-term bank deposits with an original maturity of three months or less. The carrying amount of these assets approximates their fair value.

2. ACCOUNTING POLICIES (CONTINUED)

Investment in subsidiary companies

The investment in the subsidiary company is recorded at cost less accumulated impairments. The Company assesses its investment in subsidiaries for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. Indicators of impairment may include changes in the Group's operating and economic assumptions, including those arising from changes in reserves or mine planning, updates to the Group's commodity supply, demand and price forecasts, or the possible impacts from emerging risks such as those related to climate change and the transition to a lower carbon economy. If any such indication of impairment exists, the Company makes an estimate of its recoverable amount applying a Value In Use ("VIU") approach and an impairment loss is recognised in the Statement of Income. Where these circumstances have reversed, the impairment previously made is reversed to the extent of the original cost of the investment.

The recoverable amount of the investment in subsidiary company is determined by aggregating as above the discounted future cash flow estimates of the assets in the underlying sub-group of the subsidiary company. Such reviews are undertaken on an asset-by-asset basis, except where assets do not generate cash flows independent of other assets, in which case the review is undertaken at the Cash Generating Unit (CGU) level. These cashflow estimates are discounted using asset or CGU specific discount rates.

Financial instruments

Financial assets and financial liabilities are recognised when the Company becomes a party to the contractual provisions of the instrument.

Financial assets and financial liabilities are initially measured at fair value. Transaction costs that are directly attributable to the acquisition or issue of financial assets and financial liabilities (other than financial assets and financial liabilities at fair value through profit or loss) are added to or deducted from the fair value of the financial assets or financial liabilities, as appropriate, on initial recognition. Transaction costs directly attributable to the acquisition of financial assets or financial liabilities at fair value through profit or loss are recognised immediately in the Statement of Income.

Financial assets

Financial assets are classified as either financial assets at amortised cost, at fair value through other comprehensive income (FVTOCI) or at fair value through profit or loss (FVTPL) depending upon the business model for managing the financial assets and the nature of the contractual cash flow characteristics of the financial asset.

Amortised cost and effective interest method

Income is recognised on an effective interest basis for debt instruments. The effective interest method is a method of calculating the amortised cost of a debt instrument and of allocating interest income over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash receipts (including all fees and points paid or received that form an integral part of the effective interest rate, transaction costs and other premiums or discounts) through the expected life of the debt instrument, or, where appropriate, a shorter period, to the net carrying amount on initial recognition.

Loans and receivables

Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. Loans and receivables (including due from related parties, other financial assets, bank balances and cash) are subsequently measured at amortised cost using the effective interest method, less any impairment.

Interest income on loans and receivables is recognised by applying the effective interest rate, except for short-term receivables when the effect of discounting is immaterial.

Impairment of financial assets

A loss allowance for expected credit losses is determined for all financial assets, other than those at FVTPL, at the end of each reporting period. The expected credit loss recognised represents a probability-weighted estimate of credit losses over the expected life of the financial instrument. For financial assets at amortised cost, the Company recognises lifetime expected credit losses when there has been a significant increase in credit risk since initial recognition.

2. ACCOUNTING POLICIES (CONTINUED)

Financial instruments (continued)

Objective evidence of impairment could include:

- significant financial difficulty of the issuer or counterparty; or
- breach of contract, such as a default or delinquency in interest or principal payments; or
- it becoming probable that the borrower will enter bankruptcy or financial re-organisation; or
- the disappearance of an active market for that financial asset because of financial difficulties.

For those balances that are beyond 30 days overdue it is presumed to be an indicator of a significant increase in credit risk.

If the credit risk on the financial instrument has not increased significantly since initial recognition, the Company measures the loss allowance for that financial instrument at an amount equal to the 12-months expected credit loss, which comprises the expected lifetime loss from the instrument were a default to occur within 12 months of the reporting date.

The Company considers an event of default has materialised and a financial asset is credit impaired when information developed internally or obtained from external sources indicates that the debtor is unlikely to pay the Company without taking into account any collateral held by the Company or if the financial asset is more than 90 days past due unless the Company has reasonable and supportable information to demonstrate that a more lagging default criterion is more appropriate. The Company writes off a financial asset when there is information indicating that the debtor is in severe financial difficulty and there is no realistic prospect of recovery.

For financial assets measured at amortised cost, if, in a subsequent period, the amount of the impairment loss decreases and the decrease can be related objectively to an event occurring after the impairment was recognised, the previously recognised impairment loss is reversed through the Statement of Income to the extent that the carrying amount at the date the impairment is reversed does not exceed what the amortised cost would have been had the impairment not been recognised.

De-recognition of financial assets

The Company derecognises a financial asset only when the contractual rights to the cash flows from the asset expire, or when it transfers the financial asset and substantially all the risks and rewards of ownership of the asset to another entity. If the Company neither transfers nor retains substantially all the risks and rewards of ownership and continues to control the transferred asset, the Company recognises its retained interest in the asset and an associated liability for amounts it may have to pay. If the Company retains substantially all the risks and rewards of ownership of a transferred financial asset, the Company continues to recognise the financial asset and also recognises a collateralised borrowing for the proceeds received. On de-recognition of a financial asset in its entirety, the difference between the asset's carrying amount and the sum of the consideration received and receivable and the cumulative gain or loss that had been recognised in other comprehensive income and accumulated in equity is recognised in the Statement of Income. On de-recognition of a financial asset other than in its entirety (e.g. when the Company retains an option to repurchase part of a transferred asset), the Company allocates the previous carrying amount of the financial asset between the part it continues to recognise under continuing involvement, and the part it no longer recognises on the basis of the relative fair values of those parts on the date of the transfer. The difference between the carrying amount allocated to the part that is no longer recognised and the sum of the consideration received for the part no longer recognised is recognised and any cumulative gain or loss allocated to it that had been recognised in other comprehensive income is recognised in the Statement of Income.

Financial liabilities and equity instruments

Classification as debt or equity

Debt and equity instruments issued by the Company are classified as either financial liabilities or as equity in accordance with the substance of the contractual arrangements and the definitions of a financial liability and an equity instrument.

Financial liabilities

Financial liabilities, other than derivatives, are initially recognised at fair value of consideration received net of transaction costs as appropriate and subsequently carried at amortised cost using the effective interest method. Derivatives are carried at FVTPL.

The effective interest method is a method of calculating the amortised cost of a financial liability and of allocating interest expense over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash payments (including all fees and points paid or received that form an integral part of the effective interest rate, transaction costs and other premiums or discounts) through the expected life of the financial liability, or (where appropriate) a shorter period, to the net carrying amount on initial recognition.

2. ACCOUNTING POLICIES (CONTINUED)

Financial instruments (continued)

Derivatives and hedging activities

Derivative instruments are initially recognised at fair value when the Company becomes a party to the contractual provisions of the instrument and are subsequently remeasured to fair value at the end of each reporting period. Fair values are determined using quoted market prices, dealer price quotations or using models and other valuation techniques, the key inputs for which include current market and contractual prices for the underlying instrument, time to expiry, yield curves, volatility of the underlying instrument and counterparty risk. Derivatives qualifying and designated as hedges are either (i) a Fair Value Hedge of the change in fair value of a recognised asset or liability or (ii) a Cash Flow Hedge of the change in cash flows to be received or paid relating to a recognised asset or liability or a highly probable transaction.

At the inception of the hedge relationship, the Company documents the relationship between the hedging instrument and the hedged item, along with its risk management objectives and its strategy for undertaking various hedge transactions. Furthermore, at the inception of the hedge and on an ongoing basis, the Company documents whether the hedging instrument is effective in offsetting changes in fair values or cash flows of the hedged item attributable to the hedged risk, which is when the hedging relationships meet all of the following hedge effectiveness requirements:

- there is an economic relationship between the hedged item and the hedging instrument;
- the effect of credit risk does not dominate the value changes that result from that economic relationship; and
- the hedge ratio of the hedging relationship is the same as that resulting from the quantity of the hedged item that the Company actually hedges and the quantity of the hedging instrument that the Company actually uses to hedge that quantity of hedged item.

A change in the fair value of derivatives designated as a Cash Flow Hedge is initially recognised as a cash flow hedge reserve in shareholders' equity. The deferred amount is then released to the Statement of Income in the same periods during which the hedged transaction affects the Statement of Income. Hedge ineffectiveness is recorded in the Statement of Income when it occurs.

When a hedging instrument expires or is sold, or when a hedge no longer meets the criteria for hedge accounting, any cumulative gain or loss existing in equity at that time remains in shareholders' equity and is recognised in the Statement of Income when the committed or forecast transaction is ultimately settled or extinguished. However, if a forecast or committed transaction is no longer expected to occur, the cumulative gain or loss that was recognised in equity is immediately transferred to the Statement of Income.

Taxation

The tax currently payable is based on taxable profit for the year. Taxable profit differs from net profit as reported in the Statement of Income because it excludes items of income or expense that are taxable or deductible in other years and it further excludes items that are never taxable or deductible. The Company's liability for current tax is calculated using tax rates that have been enacted or substantively enacted by the balance sheet date.

Deferred tax is the tax expected to be payable or recoverable on differences between the carrying amount of assets and liabilities in the financial statements and the corresponding tax bases used in the computation of taxable profit and is accounted for using the balance sheet liability method. Deferred tax liabilities are generally recognised for all taxable temporary differences and deferred tax assets are recognised to the extent that it is probable that taxable profits will be available against which deductible temporary differences can be utilised.

Notes to the financial statements

3. CRITICAL ACCOUNTING JUDGEMENTS OR KEY ESTIMATION UNCERTAINTIES

The preparation of financial statements requires management to make judgements, estimates and assumptions that affect the reported amounts of assets and liabilities as well as the disclosure of contingent liabilities at the date of the financial statements and the reported amounts of expenses and income during the reporting period.

As at 31 December 2025, there were no critical accounting estimates or judgements made in the application of the Company's accounting policies.

4. OPERATING EXPENSES

Operating expenses mainly include various professional fees along with the audit fee. The audit fee for the year is USD 125,992 (2024: USD 124,899).

Employees

The average monthly number of employees was nil (2024: nil).

5. DIRECTORS' REMUNERATION

None of the Directors received any fees or remuneration for their services as a Director of the Company during the financial year (2024: USD nil) either from the Company or any other entity within the Glencore Group.

6. FINANCE INCOME

USD thousand

	2025	2024
Interest income - related parties	201,138	232,110
Interest income - third parties	3,208	8,243
Total	204,346	240,353

7. FINANCE EXPENSES

USD thousand

	2025	2024
Interest expense - related parties	(123,306)	(109,210)
Interest expense - third parties	(118,292)	(150,542)
Expected credit loss	-	(1)
Total	(241,598)	(259,753)

8. DIVIDEND INCOME

USD thousand

	2025	2024
Dividend received in specie from Glencore International Investments Limited ("GIIL")	-	3,800,000
Total	-	3,800,000

Notes to the financial statements

9. TAXATION

Analysis of tax charge on ordinary activities

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply to the period when the temporary differences to which they relate unwind based on tax rates (and tax laws) that have been enacted or substantively enacted by the Statement of Financial Position date.

USD thousand

	2025	2024
United Kingdom corporation tax at 25% (2024: 25%) based on the taxable (loss)/profit for the year	-	-
Foreign withholding tax	(20,113)	(23,211)
Adjustment in respect of prior years	1,763	-
Total	(18,350)	(23,211)

Factors affecting tax charge for the current year

The tax assessed for the year is higher (2024: lower) than that resulting from applying the standard rate of corporation tax in the UK of 25% (2024: 25%).

Tax rate reconciliation

USD thousand

	2025	2024
(Loss)/profit on ordinary activities before taxation	(41,731)	3,779,946
Tax at 25% thereon (2024: 25%)	10,433	(944,987)
Effects of:		
Income not taxable	-	950,000
Adjustment in respect of prior years	1,763	-
Group relief surrendered for nil consideration	(10,433)	(5,013)
Foreign withholding tax	(20,113)	(23,211)
Tax charge for the year	(18,350)	(23,211)

Deferred tax assets of USD 178 million (2024: USD 178 million) have not been recognised in respect of deductible temporary differences and tax losses because it is not probable that future taxable profits will be available against which the Company will be able to utilise the same.

10. LOANS TO RELATED PARTY

USD thousand

	2025	2024
Non-current loans to related party	2,993,240	2,993,291
Total	2,993,240	2,993,291

Non-current loans to related party bear interest at a rate of SOFR plus margin of 2.40% per annum and are unsecured with a maturity date of 31 October 2027.

The related party is a wholly owned Glencore plc affiliate.

Notes to the financial statements

11. INVESTMENT IN SUBSIDIARY COMPANIES

USD thousand

Company Name	Country of incorporation	Ownership interest	2025	2024
Glencore Capital Finance DAC	Ireland	100%	-*	-*
Glencore International Investments Ltd. ("GIIL")	Bermuda	100%	9,625,787	9,625,787
Total investment in subsidiary companies			9,625,787	9,625,787

*Less than USD 1,000

No impairment indicators were identified at year end. The investment's recoverable value is not sensitive to material movements as a result of reasonably possible changes in underlying operating assumptions.

12. OTHER DEBTORS

USD thousand

	2025	2024
Collateral for derivative instruments	12,198	160,128
Total	12,198	160,128

All amounts are due within one year.

13. DERIVATE FINANCIAL INSTRUMENTS

USD thousand

	2025	2024
Current derivative assets	30,315	20,665
Total derivative assets	30,315	20,665
Current derivative liabilities	10,336	69,213
Non-current derivative liabilities	-	224,325
Total derivative liabilities	10,336	293,538

Included in the above are derivatives assets with related parties of USD 22.6 million (2024: USD nil) and derivatives liabilities with related parties of USD nil million (2024: USD 133 million).

14. LOANS FROM RELATED PARTY

USD thousand

	2025	2024
Current loans from related party	4,896,902	3,852,916
Total	4,896,902	3,852,916

The loan from a related party is unsecured, interest bearing (fixed interest of 1% per annum) and payable on demand.

Notes to the financial statements

15. OTHER CREDITORS

USD thousand

	2025	2024
Capital market notes interest accruals	34,501	42,309
Collateral for derivative instruments	6,640	22,750
Other accruals	-	1,902
Total	41,141	66,961

All amounts are due within one year.

16. BORROWINGS

USD Million	Maturity	2025	2024
Euro 500 million 3.750% coupon bonds	Apr.26	-	500
Euro 500 million 1.500% coupon bonds	Oct.26	-	494
Eurobonds		-	994
GBP 500 million 3.125% coupon bonds	Mar.26	-	599
Sterling bonds		-	599
Total non-current bonds		-	1,593
<hr/>			
Euro 750 million 1.750% coupon bonds	Mar.25	-	771
